

Shriya Phirke

Mumbai | shriyaphirke@gmail.com | linkedin.com/in/shriya-phirke | 8805357120

Professional Summary

Web Developer with experience of 1.5 years in designing and developing responsive, user-friendly websites using modern web technologies. Passionate about creating clean and intuitive user interfaces, solving real-world problems, and continuously expanding web development skills.

Technical Skills

- **Frontend Technologies** : HTML5, CSS3, JavaScript, Bootstrap, jQuery, React.js
- **Database** : Microsoft SQL Server

Experience

SRRS Software Solutions Pvt. Ltd., Mumbai

June, 2025 - Present

- **Cable Design System**
 - Working on migration of a legacy C++ EXE-based Cable Design System into a modern React-based web application.
 - Converting existing C++ business logic into SQL stored procedures and functions for cable design calculations.
 - Developing and maintaining React.js user interface components and integrating them with backend services.
 - Collaborating with team members to optimize SQL queries and improve application performance.
 - Participating in testing, debugging, and validation of cable design calculations and database processes.
- **HRMS (Employee Performance Management)**
 - Contributed to the development of employee appraisal workflows, including appraisal cycle setup, performance metrics, and status tracking.
 - Developed and maintained React.js components for appraisal forms, dashboards, and workflow management.
 - Assisted in implementing manager and employee appraisal functionalities for performance reviews and feedback management.
 - Supported the development of rating systems and performance score calculation modules for appraisal cycles.
 - Participated in testing, validation, and enhancement of appraisal processes to improve efficiency and user experience.
- **Waste Management System (Scrap Carter)**
 - Contributed to the development of a scrap management platform that enables customers to exchange recyclable scrap for reward points.
 - Developed and maintained React.js interfaces for customer registration, scrap management, and operational workflows.
 - Implemented scrap category and sub-category management functionalities, including weight- and unit-based scrap tracking.
 - Assisted in developing customer and society registration modules to streamline onboarding and user management.
 - Supported reward point allocation, badge management, redemption workflows, and vehicle assignment features to improve operational efficiency.

Internship

Indian Council for Technical Research and Development (ICTRD), Nagpur

Jan, 2025 - June, 2025

- Built responsive web pages and forms using HTML, CSS, and JavaScript.
- Developed a registration form with input validation and user-friendly design.
- Contributed to the front-end development of an e-learning website.
- Gained practical experience in front-end web development through real-world project assignments.

Projects

Prediction And Detection of Freezing of Gait in Parkinson's Patients	June, 2024 - June, 2025
- Presented a research paper at the International Conference on Advanced Communication, Energy, and Big Data (ICACEBD-25) - Presented a review paper at the International Conference on Advances in Computing Control and Telecommunication Technologies. - Developed Deep Learning models using Python, TensorFlow, and Keras for accurate prediction of Freezing of Gait (FOG) events in Parkinson's patients. - Achieved reliable detection of key FOG events through time-series analysis of 3D accelerometer data.	

Certifications

Microsoft Learn	June, 2026
- Responsible AI with GitHub Copilot - Introduction to GitHub Copilot - Building Applications with GitHub Copilot Agent Mode - Copilot Foundations - Optimize and Extend Microsoft 365 Copilot	

Education

B.Tech, Computer Science and Engineering	June, 2021 - June, 2025
Yeshwantrao Chavan College of Engineering, Nagpur	6.58/10

Achievements

Presented research paper titled <i>Deep Learning based Detection of Freezing of Gait Events in Parkinson's Patients using 3D Accelerometer Data</i> at the International Conference on Advanced Communication, Energy and Big Data (ICACEBD-25)	June, 2025
Presented review paper titled <i>Prediction And Detection of Freezing of Gait in Parkinson's Patients Using 3D Accelerometer Data</i> at the International Conference on Advances in Computing Control and Telecommunication Technologies	Jan, 2025
